All Schools - Early Language Training

Early Language Training

Communication and language in the Early Years is an essential foundation for further development and achievement, but children too often have poor communication and language when they start school.

The Education Endowment Foundation has found that *"overall, studies of communication and language approaches consistently show positive benefits for young children's learning, including their spoken language skills, their expressive vocabulary and their early reading skills. On average, children who are involved in communication and language approaches make approximately six months' additional progress over the course of a year. All children appear to benefit from such approaches, but some studies show slightly larger effects for children from disadvantaged backgrounds."*

We are pleased to offer EYFS and primary teachers, HLTAs, TAs and EY practitioners across Ashfield and Mansfield with fully funded L2 and L3 accredited training in speech and language. The training will take place over 10 weeks of the current academic year and will involve a mix of webinars, self-directed study and a learning log amounting to 4 ½ hours each week.

One of the schools who are hosting a school visit noted above have kindly provided a **case study** of how they have use Speech and Language Therapy in thier school. This may be of some help to schools in the area and can be downloaded here:

If you have members of staff who would like to take up this opportunity, please register your schools interest by clicking the icon below. We will be in touch as soon as we have finer details.
